## Roll-Out Schedule

Programs that have already been implemented will be noted in the Introduction phase of the Environmental Program Roll-Out. All other programs will be rolled-out, with accompanying educational program, on a monthly basis. Several programs will be rolled-out each month, from September 2007 to August 2008.

A number of the above mentioned programs will not be officially included in the following schedule, as they are not necessarily programs that are of particular interest to our guests. For instance, the laundry cleaning process is in place, and since there are no proposed changes that can be marketed to the guest, it is not important to include in this schedule. Others, such as delivery schedules, are included only as deadlines for which to bring all units into compliance but not of importance to the guest.

### ***New York Area***
